

Ball Chargers

Lime Systems – Bulk Storage Solutions can design specific grinding media feeding systems to suit your ball charging requirements.

The Lime Systems – Bulk Storage Solutions Ball Chargers are designed to accept grinding media from drums, front end loaders, bobcats, or an overhead travelling magnet. Lime Systems have successfully implemented Ball Charging systems to clients globally, carefully tailoring each product to the client's needs.

Clients have the option of configuring the Proprietary Lime Systems – Bulk Storage Solutions Ball Chargers to be;

- Locally or remotely controlled
- Automatically feeding via a timer or weighing system such as load cells.
- Manually feeding via a handwheel or a chute

Lime Systems Ball Chargers can also be configured to your storage and grinding media loading requirements, we can optimise your current feeding method, retrofit and re-design a safe media loading system.

Lime Systems – Bulk Storage Solution provide grinding media feeding solutions for Ball Mills, SAG Mills and Vertimills. Please don't hesitate to contact us for your grinding media feeding needs.

Clients can choose from a range of configurations for the Proprietary Lime Systems – Bulk Storage Solutions Ball Chargers, such as locally or remotely controlled systems. The ball chargers can be set up for automatic feeding via a timer or weighing system using load cells or manually fed through a handwheel or chute. Additionally, Lime Systems can customize the ball chargers to meet your storage and grinding media loading requirements. With the expertise to optimize current feeding methods and retrofit safe media loading systems, you can count on Lime Systems to deliver a tailored grinding media feeding solution for Ball Mills, SAG Mills, and Vertimills.

If you're looking for grinding media feeding solutions for your mills, Lime Systems – Bulk Storage Solutions Ball Chargers are the ideal choice. With a focus on customization and tailored solutions, Lime Systems can design and implement a grinding media feeding system that meets your specific requirements. Contact us today to discuss your grinding media feeding needs and explore our range of ball charging solutions.
