

Bin Activators

SILO BIN ACTIVATORS

Lime Systems have developed a full range of heavy duty, bolted seal ring bin activators designed to enhance the material discharge from either new or existing storage silos.

- Latest CAD design for optimum gyratory forces on the unit's centroid
- Low profile design reduces silo height and increases retrofit capability.
- Silencing hanger isolation bushes
- FIFO Flow of material (First in-First out)
- Low power requirement
- Integrated isolation gate.

Lime Systems offers state-of-the-art Silo Bin Activators that are designed to ensure the efficient flow of stored materials. Silo Bin Activators are essential components of any silo storage system, ensuring reliable discharge and preventing material bridging and clogging. Lime Systems Silo Bin Activators are engineered to handle a wide range of materials, including powders, granules, and flakes, and can be customized to meet specific application requirements.

Featuring advanced technology and robust construction, Lime Systems Silo Bin Activators are available in a range of sizes and configurations to suit different storage capacities and flow rates. With years of experience in the bulk storage solutions industry, Lime Systems' team of experts can design and engineer a Silo Bin Activator system that meets your unique needs, ensuring optimal performance and efficiency. Contact Lime Systems today to learn more about our Silo Bin Activators and how they can enhance your silo storage operations.

Address: 133 Kurnall Rd, Welshpool WA 6106
Hours: Open 9am - Closes 5 pm
