

Flocculant Preparation

Lime Systems have designed and developed a range of flocculant storage, mixing and dosing facilities for powdered polymers & reagents. Each flocculant plant is customised to suit the operating parameters required, the flocculant variety and delivery method.

Different flocculants have varied properties which meant the design of the flocculant production plant must consider the addition and mixing specific to the applied product and the water treatment required. Lime System's build small skid mounted packages through to large scale fixed plants. Lime Systems plant has been used for clarifiers, thickeners, waste water treatment and drinking water treatment among many other process modification and treatment requirements.

Lime Systems have designed, fabricated and delivered mixing and dosing packages for, Guar, Finnfix, Xanthate, CMC, SMBS, Soda Ash, Hydrated Lime & Magnesia Oxide.

Flocculant Preparation is an essential process for many industries, including mining and water treatment. Lime Systems provides custom-designed Flocculant Preparation systems to meet the unique requirements of your plant. Our systems are designed to handle a wide range of flocculants, including powdered and liquid forms, and are tailored to your specific application. We offer complete turnkey solutions, including design, engineering, manufacturing, installation, and commissioning, to ensure that your plant operates efficiently and effectively.

Our Flocculant Preparation systems are designed for optimal performance and reliability, with high-quality materials and components that ensure long-lasting operation. We offer a range of options to meet the specific needs of your plant, including different mixing technologies, control systems, and automation options. Our team of experts works closely with you to understand your requirements and design a system that meets your needs, from small-scale operations to large-scale facilities.

At Lime Systems, we are committed to providing our customers with the best possible Flocculant Preparation solutions. We pride ourselves on our engineering expertise, innovative solutions, and exceptional customer service. Contact us today to learn more about our Flocculant Preparation systems and how they can benefit your plant. Our team of experts is ready to help you find the right solution for your needs, and we are committed to delivering the highest quality systems and services to ensure your success.
