

Screw Feeders

For applications the delivery of powdered products into the process at set rates, Lime Systems – Bulk Storage Solutions have the ability to design and manufacture a full range of screw conveyors with variations for mixing, blending, heating, cooling or drying as required. Units can be manufactured in mild steel, stainless steel or with abrasion resistant components to suit the application.

All screws are of heavy duty, mining industry construction with specialised shaft sealing, grease purged labyrinths and outboard mounted ball bearings. Lime Systems – Bulk Storage Solutions incorporate best in class drive units in all units we manufacture.

Lime Systems – Bulk Storage Solutions can tailor screw conveyor designs to your specialised needs. Inlet and discharge designs are available for hazardous and dusty material applications.

Contact us for your tailored screw conveyor needs.

Lime Systems offers a range of screw feeders for handling a variety of dry bulk materials. Our screw feeders are designed to provide accurate and reliable feeding for various applications, including lime and cement, fly ash, flour, and more. With different sizes and configurations available, we can provide a custom solution to meet your specific needs.

Our screw feeders are constructed from high-quality materials, ensuring a long service life with minimal maintenance requirements. They are designed to handle even the most difficult materials and can be equipped with specialized features such as variable speed drives, flexible connections, and explosion-proof motors. Our team of experts can work with you to determine the best configuration for your operation and ensure that your screw feeder is optimized for maximum efficiency and performance. Contact us today to learn more about our screw feeder solutions.
